

Key Features

The Genee's Magic Pen implements the photoelectricity technology to allow you write on any normal CRT screen directly. Its hardware design takes both regular and professional users' requirements into consideration and offers the following features:

- Writing Pen: A cord connects the pen to the controller to provide the most convenient maintenance and effectively prevent the pen's loss and damage from dropping on the ground.
 - Writes on any 15"-21" CRT monitor, no additional equipment necessary.
 - Visible status indicator: Displays the pen's working status. It gives the first warning to the user whenever something goes wrong.
 - Modularized design: Makes future system update more feasible and flexible.
- Genee's Magic Pen will offer overall integrated digital solutions to your presentation needs from writing panel, visual presenter to central control system in the future. All products will be modularized designed so that customers can purchase modules to assembly their own systems.
- Two key-presses on the writing pen allows the pen to function as a mouse.
