

Genee Gel

Overview

Genee Gel is an original ideas investigation tool. It has been designed with very individual characteristics. Genee Gel allows the user to type in information in text form which will generate a mind map automatically known as an ideas Investigation Tool, users can explore complex and interlinking information.

Shapes, images, videos, sound and text can all be created easily and allow complex ideas to be investigated through a simple process.

Uses of Concept Mapping

Study Guides: A process of studying in a constructive way.

Knowledge Reflection and Integration Tool: A method for learners' to self-assess their own learning.

Planning Tool: A shorthand form for organising and sequencing ideas.

Asses learning: Concepts maps generated adter instruction reflect the growing knowledge of the learner.

Teaching: it will help manager/trainers to be more aware of the key concepts and relationship amongst them. This helps to convey a clear picture of the key topics and their reallationships to their colleauges. In this way, it is unlikely that an employee will not comprehend key concepts or have gaps in their knowledge or understanding.
