

# Clicker 5-Now in India

## Changing the way children write!

Used by children of all ages and abilities, Crick Software's Clicker is the powerful and easy-to-use multimedia and writing support tool used in 90% of UK primary schools.

Used on over half a million school computers, Clicker 5 is the best thing ever to happen to children's writing. Quick to learn and easy to use, with Clicker 5 you will discover that your pupils want to write! And with direct online access to hundreds of top-quality free resources within the program, you'll save valuable preparation time too!

Using Clicker Grids, children write with whole words, phrases and pictures. By using sets of linked grids, pupils have access to an unlimited number of words and pictures that provide a framework or scaffold for their writing. The clear British English voice automatically reads out each sentence, highlighting each word as it goes. This really motivates children to check their writing and correct it themselves.

*Pupils who are just starting to write, or who struggle with writing, do all their work from the Clicker Grids.*

Just clicking on a word sends it into Clicker Writer, Clicker's word processor. If pupils need help in choosing the right word, they can hear the word before they write it. More able children use the Clicker Grid as a talking word bank for just the more difficult words, and use the keyboard for the rest.

*Clicker 5 makes it incredibly easy for you to create and edit sets of grids for your pupils.*

It's so easy that you can do it on the whiteboard, and get your pupils to suggest the words as you talk about the subject! Because editing Clicker Grids is so simple, you will find it easy to modify them to create differentiated materials to suit all your pupils.

*Pupils of all abilities love Clicker!*

They create anything from simple documents to talking books (using pop-up grids for support if they need it) and even multimedia presentations using digital photos, sounds and video. Whatever their ability level, pupils find writing and creating with Clicker hugely motivating, putting them in control and enabling them to take pride in their work.

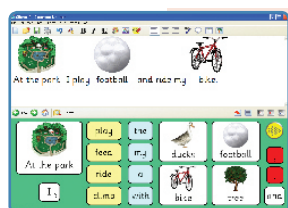

*The easy-to-use templates make it a breeze to create Clicker activities to support pupils of all ages and abilities in all curriculum areas.*

Create sentence building grids, word banks, writing frames, talking books and labelling activities. Just choose a template and add words and pictures to get your pupils started.
